

### **Painless Vaginal Bleeding**

[No Pain-bolt signs and Vagina-violets Bleeding](#)

The painless vaginal bleeding (fetal blood) occurs suddenly after membrane rupture.

### **Fetal Distress**

[Fetus shooting Flare-gun](#)

Fetal distress includes fetal bradycardia (<110 bpm), decelerations or sinusoidal pattern on fetal heart tracings. Fetal death can quickly occur through exsanguination or asphyxiation if fetal vessels are compressed during labor.

## **Diagnosis**

### **Doppler Ultrasound**

[Doppler-weatherman using Ultrasound](#)

A transabdominal or transvaginal U/S with color doppler shows fetal vessels overlying the internal os and decreased blood flow within fetal vessels.

## **Treatment**

### **Emergency Cesarean Delivery**

[Emergency-Lights C-section](#)

An emergency C-section is usually indicated if there are signs of fetal distress.
